

MOBILE ROTARY ATOMISER

Product aim

To provide a completely mobile solution to localised dust and odour issues.

How it works

It operates with a simple on/off switch and produces 20m of finely atomised mist, allowing close targeting of odours and dust. Rotary atomiser requires a 110V or 240V electrical supply from a generator of at least 5,5 kVA.

Applications

Water treatment
Landfill sites
Remediation
Composting sites
Recycling
Construction & demolition

Features

highly mobile, with integral trailer

low maintenance

1125L bowser tank – provides a full day's operation before refilling

low operation costs

no oscillation available

Key information

Throw	up to 20 meters
Air volume	3000 m ³ /h
Water consumption	max. 3 l/min
Droplet size	40-70 microns
Noise	78 dBA (3 m)
