

GENERAL CHARACTERISTICS

For applications where it is necessary to measure pressure, with local display, full adjustable via APP "MY VALCO" available on Android ® app store.

The power supply to the sensors is between 15 and 30 Vdc, and the output signal is available with 4...20 mA, or 0...10V, or 0...5V or 1...6V, M12 electrical connection.

Data logger function included as standard.

- Sensing element thin-film-on-steel
- Full control via APP "MY VALCO".
- 2 x PNP switching output
- Degree of protection IP67

PRESSURE RANGES

Tab.1

Measuring ranges	Over pressure	Burst pressure	Code
Bar	Bar	Bar	
0 - 2,5	7,5	50	0002
0 - 4	12	60	0004
0 - 6	18	100	0006
0 - 10	30	200	0010
0 - 16	48	200	0016
0 - 25	75	300	0025
0 - 40	120	300	0040
0 - 60	180	400	0060
0 - 100	300	500	0100
0 - 160	480	750	0160
0 - 250	750	1000	0250
0 - 400	1000	2000	0400
0 - 600	1500	2500	0600

TECHNICAL DATA

Tab.2

	Description	Code
Measuring element	thin-film-on-steel	TF
Power supply	10 ÷ 35 Vdc	-
Output signal	4 - 20 mA	420
	0 - 10 V switchable	010
Current consumption	≤ 30mA	-
Housing alignment	Display 335° rotatable	-
Linearity	Accuracy	Temperature
± 0,5 % FS	± 0,5 %	-25 ÷ 85 °C
Protection		
		IP67
Electrical connection	M12 x 1 - 4 poles plug	S3

PROCESS CONNECTION

Tab.3
